NEW FEATURES.
MODERN AND CLEAN LOOK.

DEAR PARTNERS

We are proud to introduce our new 2017-2018 winter wheel catalogue with our updated fitments. You will find many new steel wheels and winter alloy wheels that will fit the latest applications.

MULTI-USE AND DIRECT FIT STEEL WHEELS

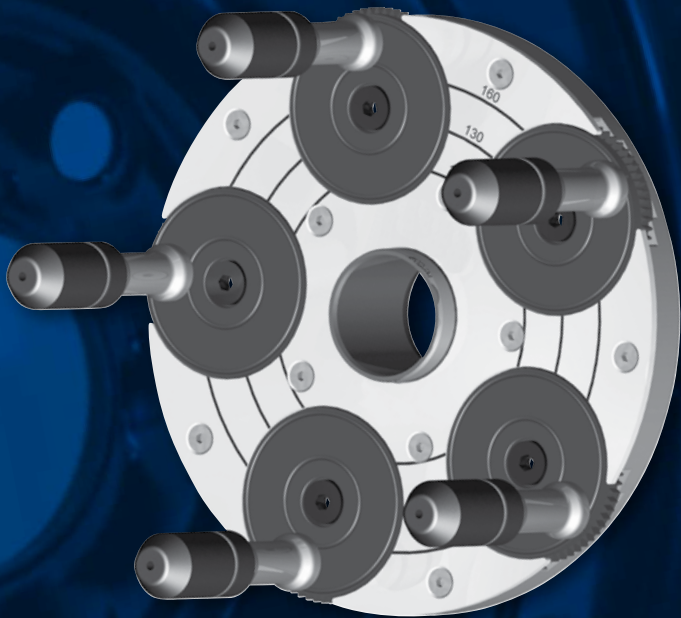

Our direct fit steel wheels and multi-use wheels are tested at the factory to respect a radial runout tolerance of .05 inch. These tests are performed to ensure a wheel that is easy to balance on a standard machine. As for any wheel, it is recommended to use a fixed fingers plates system, this way the wheel is mounted on the machine the same way as it's installed on the vehicle: centered by the hub and fixed by studs. This system guarantees that the wheel is correctly balanced at all times and will prevent customers from returning with vibration issues. Our direct fit and multi-use steel wheels are also inspected for the quality of the welds and for correct sealing to make sure they are ready to use.

DIRECT FIT ALLOY WHEELS

RTX offers many direct fit alloy wheels. This term means that your wheels won't need any centering rings, all your OEM hardware and your tire pressure sensors (TPMS) will be compatible.

TIRE PRESSURE SENSORS

All alloy wheels in this catalog are compatible with tire pressure sensors technology (TPMS)

FIXED FINGERS PLATES SYSTEM

HOW TO SELECT THE PROPER APPLICATION

- 1 Choose a manufacturer from the table of contents and refer to the corresponding page. (Ex.: HONDA).
- 2 Choose a car model. (Ex.: CIVIC)
- 3 Determine the diameter of the wheel to be installed on the vehicle (generally, you will have equal to stock or smaller diameter options).
- 4 Choose from the options either the original wheel number, direct fit or multi-fit.
- 5 Alloy wheels are also available in many cases.
- 6 Be sure to have on hand the required accessories (nuts, bolts and centering rings) for the alloy wheels when necessary.
- 7 Check out foot notes.

Our team has put in all necessary efforts to ensure quality and accuracy of the information in this catalogue. However, if an error occurred or if a vehicle has been modified, we cannot be held responsible for any inconvenience that may have been caused.

CERTIFICATIONS AND TESTS

All our alloy wheels exceed several standards in terms of safety standards such as JWL JWL-L VIA certifications.

The JWL standard is a set of specific requirements for alloy wheels. This standard is established by the Japan authorities and it's required for every vehicle in the country. These requirements are amongst the most rigorous in the industry. The letters JWL in the casting of a wheel is the certification that it was tested by the manufacturer to respect this standard.

The VIA markings represent the vehicle inspection association in Japan. They do independant testing of alloy wheels to ensure that they conform to the JWL standard. A tested wheel will be marked with the VIA and JWL letters.

SAFETY AND SECURITY MULTIPLE TESTS

- 1 Radial stress test (500 000 rotations)
- 2 Rotary bending fatigue (100 000 rotations)
- 3 13 degree impact test (drop height 230mm)
- 4 Meets all the criteria of load rating
- 5 Air leak test on each wheel
- 6 X-Ray test on each wheel
- 7 Sodium dripping test

TCA QUALITY

When you see the TCA (Tested-Certified-Approved) logo on a product, it certifies that quality and safety tests related to this product meet or exceed strict requirements.

A wheel displaying the TCA logo assures you that our suppliers have paid special attention to the quality control, origin and manufacturing of this wheel.

The manufacturers thus must pass a large number of tests on the wheels they manufacture to obtain precise certifications for each wheel. Here are the standards and certifications obtained by our manufacturers:

- **ISO9000:** *ISO9000 refers to a set of quality management standards published by the International Standards Organization (ISO). An ISO9000-certified wheel manufacturer must provide lasting performance in the quality of these products, which meet very precise requirements.*
- **ISO/TS16949:** *This standard guarantees the quality of the product and is specific to the automobile industry.*
- **SFI, JWL AND TUV PERFORMANCE CERTIFICATIONS:** *These certifications assure you that all the laboratories meet precise performance standards.*
- **ENVIRONMENTAL PROTECTION:** *Certification that the plant meets a series of specific environmental protection standards.*
- **90% RATING AND UP:** *Strict verifications on quality standards and best practices are conducted with the manufacturers. Only those with a global note of 90% and more with those audits will be selected.*

TCA wants to make your job easier in your decision-making process and assures your peace of mind.

TCA - UNCOMPROMISING QUALITY.

MAINTAINING YOUR ALLOY WHEELS

Proper maintenance will prevent damage to the wheel finish and keep the wheel finish warranty from being voided. Before installation, apply a coat of non abrasive car wax to the wheels (except on wheels with a matte finish) which will help protect the finish and make it easier to clean them. Clean your wheels often using mild soap and water and a soft sponge or cotton cloth to clean them. Reapply a coat of wax at least once per season. Do not use abrasive cleaners, pads or polishing compounds on your wheels. Do not wash your wheels when they are hot as it will damage the finish. Do not use chrome polish on painted chrome (PVD) wheels; they should only be cleaned with mild soap and water.

LIMITED WARRANTY

Robert Thibert Inc. warrants to the original purchaser, that the wheels will be free from cosmetic defects for one (1) year or three (3) years, based on the indication, from the date of purchase. Robert Thibert Inc. also warrants that its wheels will be free from structural defects for as long as the original purchaser owns the product. This warranty is only valid when the wheel(s) are returned to Robert Thibert Inc. freight prepaid with a copy of the original proof of purchase. Robert Thibert Inc. obligation under this warranty will be limited to the repair or replacement of any wheel(s) which is considered to be defective. Robert Thibert Inc. will inspect all warranty returns. Wheels covered by our warranty will be repaired or replaced and returned to the sender freight prepaid. Those wheels that are not covered by the warranty will be returned freight collect.

What is covered?

1. Peeling of the clear coat, chrome or paint on the face of the wheel.
2. Blemishes in the clear coat, chrome or paint finish of the wheel.
3. Wheels with lateral or radial run out greater than 0.025" or 0.635mm provided there is no evidence of impact.
4. Wheels with improperly machined bolt holes, center bores or offsets.
5. Wheels that leak air

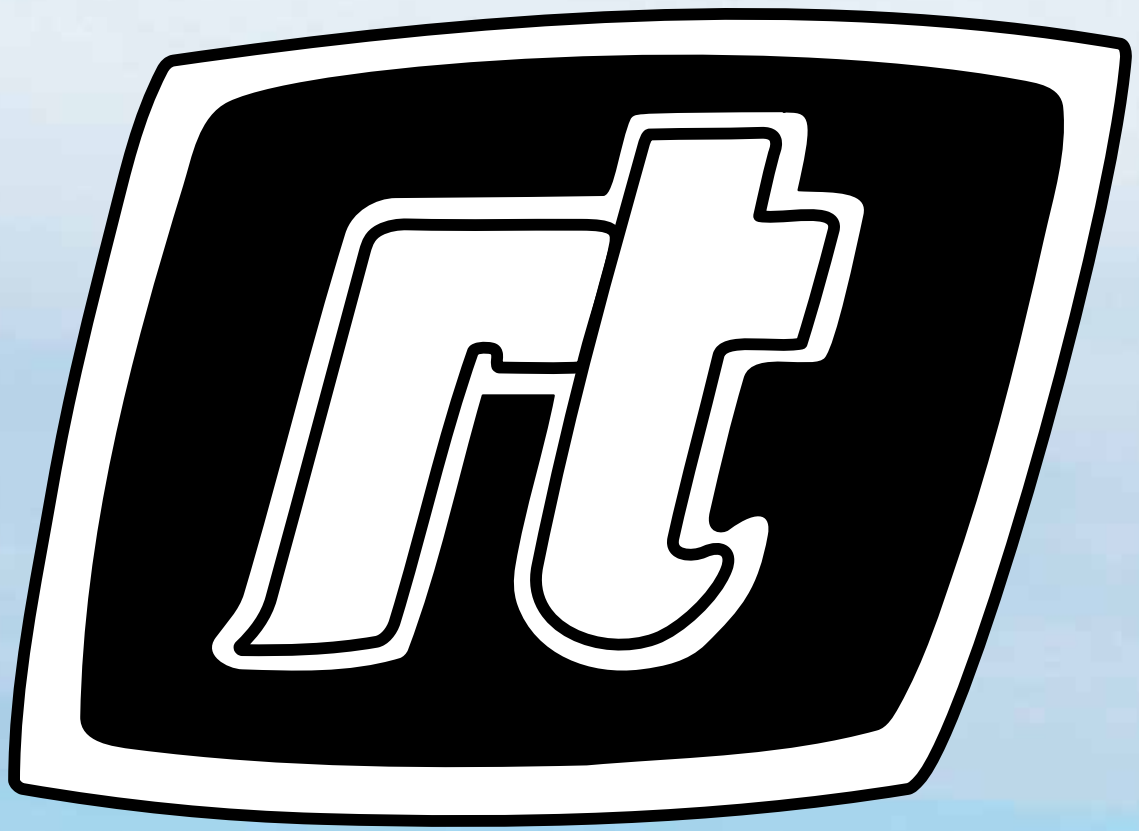

What is not covered?

1. Peeling of the paint, clear coat or chrome in the barrel or on the back of the wheel.
2. Wheels that have a lateral or radial run out of less than 0.025" or 0.635mm.
3. Wheels that have been damaged by accident, impact, misuse, negligence, off road use, racing or exceeding the maximum load rating.
4. Scratches, stone chips or curb rash caused by road hazards.
5. Damage caused by tire installation or the use of an impact gun.
6. Use of clip on weights on the outer lip of the wheel.
7. Corrosion, pitting, scratches or staining due to improper wheel maintenance.
8. Wheels that have been altered, modified or repaired.
9. Defects that are claimed more than one (1) year or three (3) years, as the case may be, after purchase.
10. Claims made by anyone other than the original purchaser.
11. The finish warranty for chrome and chrome painted (PVD) wheels will be voided if the wheels are used in the winter
